

Construction EPC Projects

*The most customizable
PMS for your company*

Problem

EPC and construction teams must align material deliveries, vendor commitments, subcontractors, BOQs and budgets. But scattered Excel sheets, WhatsApp messages & emails make tracking everything a challenge.

Cost overruns & margin leakage

Material costs rise, BOQs drift from actual work, and site expenses quietly eat into already tight project margins. Teams cannot see what they have spent or committed until costs have already exceeded the budget.

Delayed billing and poor cash flow

Completed work goes unbilled while measurements, documents and approvals remain pending. Without timely billing and collections, paying vendors and subcontractors becomes increasingly difficult.

Procurement and material delays

Materials arrive late, vendors miss commitments, and subcontractors fall behind schedule. Scattered updates across Excel, WhatsApp and emails leave teams chasing deliveries while work stalls.

Supista connects planning, procurement, site execution and project finances, helping construction teams manage daily work and track project progress in one place.

KEY FEATURES

Planning & Scheduling

Plan tasks, milestones and subcontractor schedules to keep site activities aligned with deadlines.

BOQ & Budget Control

Track BOQ quantities, project budgets and actual costs to spot cost overruns early.

Procurement & Vendors

Manage purchase requests, vendor quotations, purchase orders and material deliveries against BOQs

Billing & Approvals

Manage vendor bills, auto bill unbilled client invoices and approval workflows to keep project payments moving.

Daily Site Reports

Capture daily progress and expenses, completed work, material usage and site expenses in structured daily project reports.

Analytics & Dashboards

Monitor project progress, budgets, procurement and billing through dashboards that highlight delays and cost overruns.

One Connected Project Lifecycle

Connect budgets, procurement, materials, execution and billing—so every team works with the same project information. Illustrative example: HVAC installation for a commercial building.

Mobile Access

Manage your site activities anytime, anywhere with Supista's intuitive mobile interface.

Log site updates, record expenses, and track material deliveries on the go — keeping site teams and office staff connected.
